

2022 Golf GTI/Golf R

Quick-Start Guide

European model shown. Specifications may vary.

Optional features shown.

The information within this guide must be used in conjunction with the information in the Volkswagen Owner's Manual. You should refer to your vehicle's Owner's Manual, and Infotainment Supplement for all information, warnings, and feature limitations. Always pay careful attention to the road and do not drive while distracted. Some Infotainment features can only be accessed and operated when the vehicle is standing still.

Introduction to **Your Golf**

1. **Digital Cockpit Display**
   Allows you to customize the presentation of vehicle information in the instrument cluster. The **VIEW** button on the steering wheel toggles between multiple main display views. The secondary display can be selected and configured using the horizontal menu buttons, along with the vertical arrow buttons on the right-side steering wheel controls.

2. **Head-Up Display (not shown)**
   The Head-up display projects selected information onto the windshield in the driver's field of view, such as the current speed limit, the vehicle speed, and the actions of driver assistance systems. To turn system on, from the Infotainment: select **Vehicle menu > vehicle** (left hand side) **> Interior > Head-up display >** toggle Head-up display to **Active**.

3. **Quick Access Buttons**
   The quick access buttons below the Infotainment system provide a fast, easy way to access often-used features.
   ASSIST: The ASSIST button opens a graphic interface to allow the activation, deactivation and modification of advanced driver assist systems.
   CLIMA: The CLIMA button opens the controls for all the user-adjustable options for the climate control system, including temperature, fan speed, airflow and more.
   MENU: The Park MENU button opens the Park Assist system menu to assist the driver when parking and maneuvering. Tap the Settings function icon to open various parking systems.
   MODE: The Drive MODE button opens the menu to select the vehicle's driving mode, which can affect things such as steering feel, engine sound, and adaptive cruise control behavior.

4. **Infotainment**
   Touch sensitive icons control the various Infotainment functions, including: radio, media selections, App-Connect functions, phone operation, vehicle functions and the optional Navigation system. To move icons press, hold and drag to the desired location.

5. **Start-Stop System (not shown)***
   The engine shuts off automatically when the vehicle comes to a stop, such as at traffic lights. The engine will restart when the brake is released. Start-Stop automatically activates when the ignition is switched on, and the indicator light comes on. If deactivated, the indicator light comes on and the start-stop system is not available. To deactivate, from the Infotainment system, use the pull down menu and press the Start/Stop button to turn off.

   *Available on DSG transmission only.

6. **Automatic Transmission Selector Lever**
   With the vehicle on and the brake pedal depressed, move the lever forward or backward until the pressure point indicates you are in position. To skip a gear, push past the pressure point to the next pressure point. The label next to the lever will light up for the selected gear position.

7. **USB-C Port**
   USB Type C ports allow you to connect your mobile phone to your Golf with the latest generation of USB. For data and charging, USB Type C ports are available in the cubby in front of the selector lever. Charging only USB-C ports are available in the rear. To utilize USB Type C, you must have a compatible cable. To find a cable that converts your phone's charging port to a USB Type C connector, **click here**.

8. **Steering Wheel Left Side Controls**
   Buttons for operating Driver Assistance features. Volume settings for radio, navigation system notifications, and phone calls. You can slide your finger or press on each side to increase or decrease volume. On R models, you can select a driving mode by pressing the button.

9. **Steering Wheel Right Side Controls**
   - **Voice Control Button:** Activates the Voice Recognition system. A short press activates Volkswagen's native Voice Recognition system. A long press will activate Voice recognition to a compatible paired phone's digital assistant.
   - VIEW **VIEW Button:** Switches displays between the following views: Summary, Classic, Navigation, Driver Assistance, and Special. You can also select and configure secondary displays by using the buttons to select the right or left secondary display, select your preferred secondary display using the buttons, then press the OK button to confirm selection. To view or hide secondary displays, press and hold the **VIEW** button.
   - OK **OK Button:** Used to confirm selections, and answer telephone calls.
   - **Steering Wheel Heating:** Press to turn on at the highest level, press repeatedly to adjust the heating level.
   - **Horizontal Menu Buttons:** Used to navigate through the instrument cluster's main menus.
   - **Vertical Arrow Buttons:** Push to navigate inside a specific menu.
   - **Horizontal Arrow Buttons:** Slide your finger or press on either side to change radio stations, scroll through radio presets, or select the next or previous media track.

10. **Wireless Charging**
    Can charge a Qi-capable mobile phone without the need to plug in. Simply place it securely in the center of the surface with the display facing up. An alert in the Infotainment system display indicates when charging begins.

Infotainment/
Climate Control

Infotainment

The touchscreen features access icons for many functions, including Apps, Vehicle, Sound, Navigation, Telephone and more.
To customize the order of icons:

1. Touch and hold an icon until it is highlighted.
2. Drag and drop the icon to the desired location.

The touchscreen allows users to create customized “widget pages” with their most desired features. To create a new widget screen using a layout of your choice:

1. Swipe to the right, until you are on the last available page.
2. Touch and hold an existing widget, and tap the **EDIT** button.
3. Touch the **+** key and choose a page layout of your choice.
   Note: You can have up to 4 individual layout screens.
4. Press the **EDIT** button to choose the widgets you want to use in each section. Some features are not available in all widget sizes.
5. Change a widget space by tapping it, until it is highlighted in blue. Then, with a press, select an available widget listed below.
6. When finished, tap the **X** button.

Watch the Customize Infotainment Screen video.

To edit these widgets later, press and hold a widget for 2 seconds to enter into the modification screen again.

The desired features are now ready for touch control.

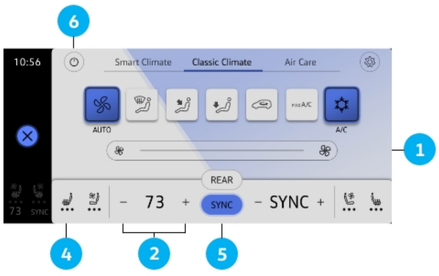

- The Climate Control widget offers several swipeable screens to best suit you.
- The Navigation widget provides easy input of destinations and Points of Interest.
- The Phone widget puts call information at an easy-to-read level.
- The Radio widget gives quick access to audio selections. Tap a station to select.

For additional help, the Help widget can provide more information on using the Infotainment system.

Climate Control

Controlling Climatronic

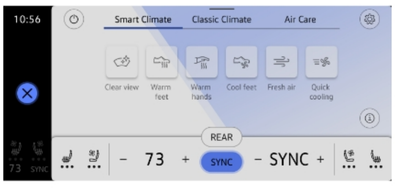

To control the HVAC system, press the CLIMA button, located beneath the Infotainment screen and the temperature and volume slider bars. Traditional controls are located under the Classic Climate tab.

1. **Fan:** Toggle the smaller or larger touch-sensitive keys to decrease or increase fan speed, slide across the slider bar, or simply touch the slider bar in the desired location.
2. **Temp Adjust via the Touchscreen:** For small adjustments, tap the **+** and **-** buttons. For dramatic changes, press and hold the temp number, then drag left (**—**) or right (**+**).
3. **Temp Adjust via the Slider Bar (not shown):** You can also use the slider bar to adjust the temperature, using the same concept. Tap or slide your finger left for colder temperature and right for warmer.
4. **Seat Heating:** Tap icons within the climate screen to activate or adjust intensity. An Auto on function is also available, located within the Settings menu.
5. **Sync:** The driver’s settings will be applied to the passenger and rear climate zones.
6. **On/Off:** At the top of the screen, tap the button to turn climate control on and off.

Smart Climate

The Smart Climate tab offers climate control shortcuts, which automatically trigger the HVAC system to perform selected actions.

- : Clears fog and ice from the windshield.
- and : Directs warm or cool air to the footwell.
- : Directs warm air onto the steering wheel.
- : Directs fresh air from outside into the interior.
- and : Temporarily, increases the heating or cooling power.

Watch the Touchscreen Climate Control video.

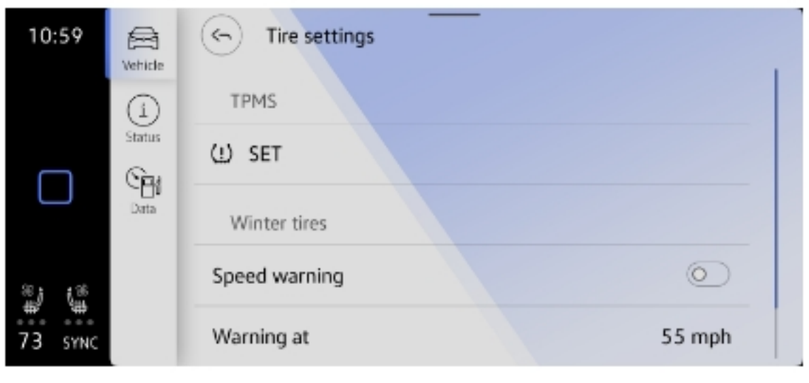

Warning: See Climate Control in your Owner's Manual for more detailed information and for important safety warnings.

TPMS/Keyless Access/
Memory Seats

TPMS

Tire Pressure Monitoring System (TPMS) Recalibration

After being notified about low tire pressure and correcting what caused the warning light, switch the ignition off and back on. The Tire Pressure Monitoring System can only be recalibrated after this is done.

1. Switch the ignition ON.
2. Turn on the Infotainment system.
3. Tap **Vehicle** on the Infotainment touchscreen.
4. Tap **Vehicle** (left-hand side) .
5. Tap **Tires.**
6. Tap **Set.**
7. If all four tires meet the required tire pressure values, tap OK .

After longer trips (at least 20 minutes) driving different vehicle speeds, the system adapts to the new values and monitors them.

Keyless Access

Keyless access makes it possible to unlock and lock the vehicle without actively using the key. A valid key must be present within the vicinity of the vehicle to use this function. The trunk will lock and unlock along with the doors.

- Keyless Access can be configured from the home menu. Select **Vehicle > vehicle** (left hand side) , select **Exterior >** swipe to the third page and select **Central Locking** and make your desired selection.

Unlocking the Vehicle

1. Make sure Keyless Access has been configured.
2. Approach the vehicle with a valid key.
3. When the vehicle key is detected within range of any of the sensors, slip your hand behind the handle and lightly touch the back. The vehicle will unlock and all turn signals will flash *twice* to confirm the vehicle has been unlocked.
4. To unlock all doors, double tap your hand behind the handle.

Locking the Vehicle

1. Park the vehicle.
2. Touch the sensor on the outside of the door handle.
3. All turn signals will flash once to confirm the vehicle has been locked.

Memory Seats

1. Adjust the driver's seat and outside mirror positions to your preferred positions.
2. Press and release the **SET** button.
3. Press and hold the Memory button 1, 2 or 3 until the chime sounds.

Note: Memory seat feature is optional equipment for the GTI model. Memory seat buttons are located on the driver side.

⚠ Warning: See TPMS, Keyless Access and Memory Seats in your Infotainment System Booklet for more detailed information and for important safety warnings.

Windshield Wipers/
Light and Vision Panel

Windshield Wipers

Intermittent/Rain-Sensing

- From the **OFF** position, move the wiper stalk one click down to activate the intermittent wipers with rain-sensing.
- The switch on top of the stalk varies the time interval between each wipe.
- The farther the switch is moved to the right, the shorter the interval between each wipe will be.

Note: Ensure wiper stalk is in OFF position before entering a car wash.

Continuous

- **LOW**: From the **OFF** position, move the wiper stalk down two clicks.
- **HIGH**: From the **OFF** position, move the wiper stalk down three clicks.

Rear Wiper

To operate, push the lever one click away from you. If you have the front wipers on and you put the car in Reverse, the rear wiper activates a single wipe.

Service Position

From the home menu select **Vehicle > vehicle** (left hand side) > select **Exterior >** swipe to page four and select **Service position** and wipers will move into place.

Light and Vision Panel

Turning on the Lights

1. Switch on the ignition.
2. Tap the MODE button repeatedly until the desired light setting is highlighted in the Digital Cockpit Display, and illuminated on the touch panel.

: When this icon shows in green, the low beams are on.

AUTO : Automatic headlights are enabled. The low beam headlights are switched on or off depending on the ambient brightness.

: When this icon shows in green, the parking and daytime running lights are on.

MAX : The Climatronic defrost function clears fog and ice from the windshield. The air is dehumidified and the blower is set to a higher speed.

: Switch the rear window defroster on and off when the vehicle is drive ready. The rear window defroster switches off automatically after a maximum of 10 minutes.

FRONT : (If equipped) The fog lights can be switched on when the ignition is on and the parking lights or low beam headlights are on.

FRONT : (If equipped) Poor weather lights can help illuminate the road ahead more effectively when visibility is poor. To switch on, the vehicle's ignition must be on.

Watch the Light and Vision video.

⚠ Warning: See Wipers, Lights and Vision Panel in your Infotainment System Booklet for more detailed information and for important safety warnings.

Navigation

From the home screen, press the **NAVIGATION** icon to open the Navigation **Home View**. The Home View shows your current position in the middle of the screen as a cursor. The cursor is the actual position of the vehicle situated in relation to five suggested destinations which are based off of your last destinations, predicted destinations, favorites or imported destinations from your Car-Net® app. The Home View map is oriented with north at the top of the screen and the actual positions of the proposed (0-5) destinations are relative to the actual position of the vehicle.

To enter a destination:

1. On the touchscreen, press the **Navigation** icon.
2. Select the **Search** tab.
3. Begin entering address information with the House number, Street and City or Point of Interest (POI).
4. When your search address or POI appears in the drop down suggestion bar, select the correct address on the screen.
5. Select **Start** to begin the route.

Applies to vehicles equipped with Navigation. When entering an address for another state, use only the two–character abbreviation for the state. Entering a destination on the touchscreen or changing any settings can only be done when the vehicle is stationary.

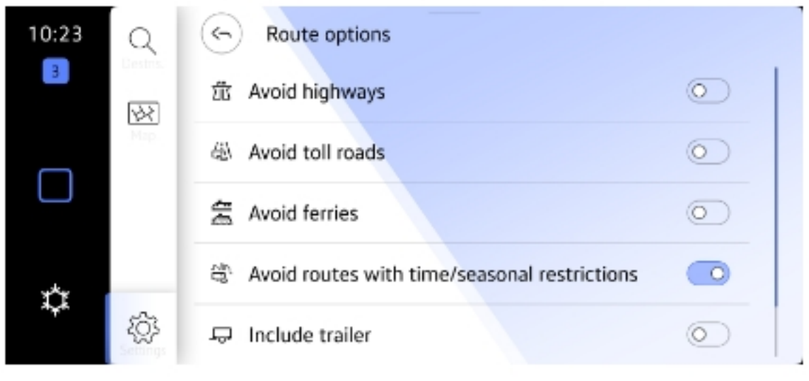

Additional Settings

Before starting your route:

- Route criteria can be modified within the Navigation menu, select **Settings** > select **Route guidance > Route options**.

OR

- Tap when a route is active.

Cancel Active Route Guidance

Tap the **X** to the right of the route plan.

Watch the Navigation video.

Alternative Navigation

Turn-by-turn directions are also available by mirroring your favorite smartphone app to your Infotainment screen. Using the maps app on your device, you can connect to Volkswagen App-Connect by using a manufacturer-approved cable to your vehicle's USB-C port or you can connect to wireless if available.

Car-Net Plus Navigation*

With real time information,** navigation is even smarter: keep up-to-date with practical details such as online traffic information, route calculations and map updates. Constantly updated data provides you with useful information and ensures the best possible route to your destination.

*Excludes Golf GTI S trim models.

**Availability is subject to your mobile network provider's network coverage. Requires additional paid subscription.

⚠ Warning: See Navigation in your Infotainment System Booklet for more detailed information and for important safety warnings. Navigation is an optional feature.

Driver Assistance
Features

Activate Cruise Control

Locate the Cruise Control buttons on the left side of the multi-function steering wheel.

- Press the 0/I button to activate Cruise Control.
- A speedometer icon will appear in the instrument cluster display.

Set Cruising Speed

1. When you get to your cruising speed, press the **SET** button on the multi-function steering wheel.
2. A green cruise control indicator light will appear in the digital cockpit display.
3. To increase/decrease the speed by 1 mph increments, press the + or − button.
4. To increase/decrease the speed by 5 mph increments, press and hold the + or − button.

Cancel and Resume Cruising Speed

1. To cancel the cruise speed, press the brake pedal or press the 0/I button once on the multi-function steering wheel.
2. The green cruise control indicator light will go off.
3. To resume your set speed, press the **RES** button on the multi-function steering wheel.

Turning Cruise Control System Off

- Press 0/I twice.

Travel Assist System

Applies to vehicles equipped with Travel Assist.

Within system limits, the Travel Assist system enables your vehicle to steer, accelerate, and brake automatically while also keeping the vehicle centered in lane. Travel Assist can also maintain a constant distance to vehicles in front which is selected by the driver. The driver must maintain supervision as the Travel Assist system is not an autonomous feature. To enable Travel

1. Press the button on the steering wheel at your desired speed.
2. To cancel Travel Assist, press the brake pedal or press the 0/I button on the multi-function steering wheel.
3. To resume Travel Assist, press the button on the steering wheel at the desired speed.

Note: Pressing the RES button will only resume Adaptive cruise control capabilities, and not lane centering.

Adaptive Cruise Control Distance Level Setting

Applies to vehicles equipped with the Adaptive Cruise Control feature.

Adaptive Cruise Control (ACC) helps maintain an individually stored constant speed, distance, and a previously set distance in time intervals between your vehicle and those in front of you. When you approach a slower moving vehicle in front of you, the vehicle may brake if the situation requires. When the vehicle is no longer present, ACC will accelerate back to the stored speed.

You can set the speed-dependent distance from the vehicle ahead to one of five levels.

- When the **ACC** button is pressed to set distance level, the indicator light illuminates in the instrument cluster display.
- To change the ACC distance interval, press the button to cycle through the distance intervals. When the shortest interval is reached, the distance returns to the greatest interval when the button is pressed again.
- When the ACC system brings the vehicle to a stop for more than 3 seconds, briefly press the accelerator pedal to resume Adaptive Cruise Control.

Note: This feature is not a substitute for attentive driving. See the Owner's Manual for further details and important limitations.

Deactivating Adaptive Cruise Control

Applies to vehicles equipped with Adaptive Cruise Control feature.

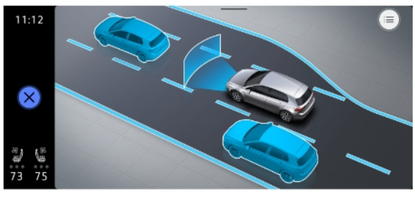

To deactivate Adaptive Cruise Control, and use Conventional Cruise Control:

1. Press the button. Depending on vehicle equipment, it may be on the steering wheel or the end of the turn signal stalk.
2. Using the vertical menu buttons on the steering wheel, scroll to **Speed**.
3. Select **Cruise Control** in the Digital Cockpit then press the OK button.

Adaptive Cruise Control is now deactivated, and your vehicle will maintain the set speed using conventional cruise control.

Assistance System Setting

If your vehicle is equipped with Driver Assistance features, you can access the Assistance system settings menu in the Infotainment system, allowing modification to the Driver Assistance feature operation.

1. Press the ASSIST button from the quick access buttons.
2. Touch the image that represents the feature.

OR

- Touch the to make your selection from the system menu in list form.

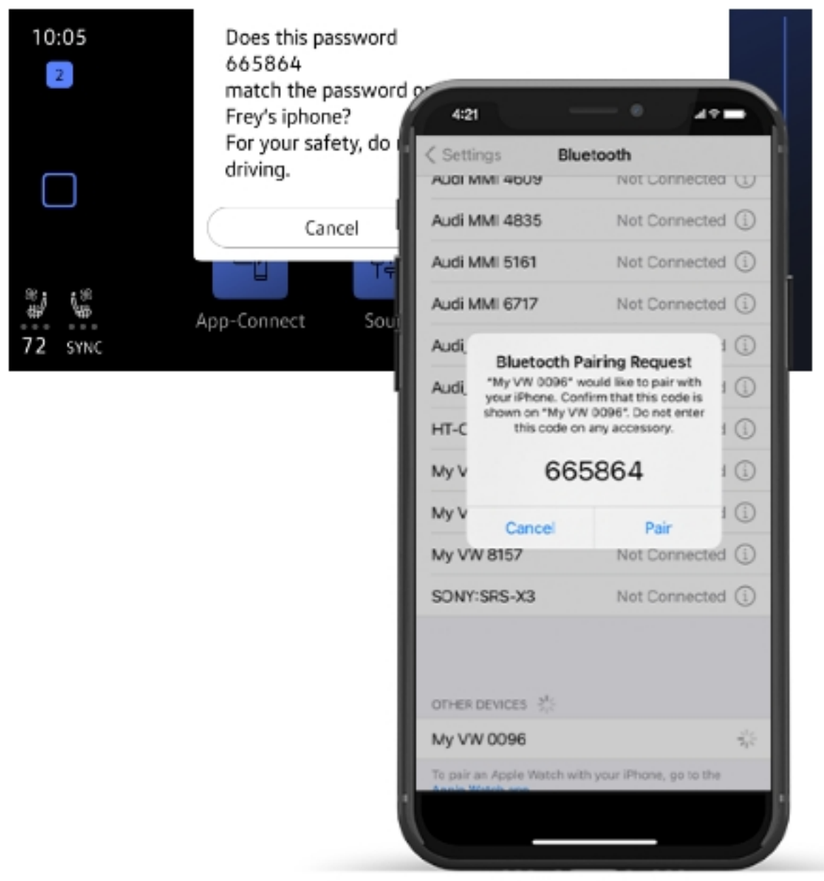

To quickly activate/deactivate driver assist systems within the digital cockpit display, press the on the end of turn signal stalk.

Watch the Driver Assistance Systems Menu video.

⚠ Warning: See Driver Assistance Systems in your Owner's Manual for more detailed information and for important safety warnings. Driver Assistance features are not substitutes for attentive driving.

Bluetooth®/
Voice Recognition

Pairing a Compatible Phone

1. With the ignition on and the vehicle in Park, turn the Infotainment system on. Your vehicle's Bluetooth system will be in "discovery" mode.
2. From the Bluetooth menu on your phone, search for new devices and select MY VW XXXX (last four digits of VIN).
3. The Infotainment display will show a PIN.
4. Make sure the same PIN is displayed on your phone and press **Yes** on the Infotainment touchscreen, then press **Pair** on your phone.
5. Allow contacts to Sync when prompted.
6. The Infotainment display will provide you options for your choosing, select Handsfree to pair your compatible phone.

Note: If your phone displays a prompt asking to connect to your vehicle, make sure to enable future automatic connections. This will help to automatically reconnect the compatible paired device to the system. Once the PIN is shown, pairing must be completed within 30 seconds; otherwise, the process will need to be repeated.

Watch the Bluetooth Pairing video.

Primary and Secondary Phone Functionality

Two active phones can be connected simultaneously. Follow steps 1-6 above. Only contacts from the primary phone will be shown within the Infotainment system. Switching between phones requires tapping the phone name in the top right of the Phone screen in the Infotainment system, then selecting the desired phone from the drop-down menu.

Note: This feature is not available when the phone is connected to Apple CarPlay® or Android Auto™.

Voice Recognition via Volkswagen Native Infotainment

Many functions of the GTI and Golf R—including the navigation, climate control, media and telephone—can be controlled using the built-in voice recognition system. Voice control can either be launched using the **Talk** button on the multi-function steering wheel or by using the activation word, "Hello Volkswagen.", similar to how you would activate a digital assistant at home.

To enable activation with the activation word:

1. Tap Home on the touchscreen and then select the settings icon.
2. Tap **Voice control**, then **enable Activation word**.

To launch the voice control with the multifunction steering wheel button:

- A short press of the **Talk** button will launch the in-vehicle voice recognition.
- A long press of the **Talk** button will launch the digital assistant of a connected compatible mobile device.

A variety of voice prompts are available depending on which language has been set in the Infotainment system, and whether there is an active VW Car–Net account for the vehicle. For full details and a list of compatible languages, please refer to the Owner's Manual. A list of example prompts can also be found in the Voice control settings.

Voice Recognition Tips

- The contact must be said exactly as it is stored in your phone's contact list.
- If multiple numbers are stored per contact, you may use the shortcut, "Call John Smith work," or the system may ask you to choose: work, mobile, home, etc.

Watch the Voice Recognition video.

Answer an Incoming Call

The Bluetooth system will interrupt your car stereo with a ringtone. Press the OK button on the multi-function steering wheel or the green **Phone** icon on the Infotainment touchscreen to answer the call.

Volume Settings

To adjust the volume of the Bluetooth system while on a call, press or slide your finger on the **Volume Up** or **Volume Down** button on the right side of the multi-function steering wheel.

End a Call

Press the red **Phone** icon within the phone menu of the Infotainment display.

Cancel Active Voice Recognition or Active Route Guidance

When voice recognition is activated, press the **Voice Control** button on the multi-function steering wheel or say, "Cancel."

⚠ Warning: Visit www.knowyourvw.com/bluetooth to view more detailed information and important safety warnings for Bluetooth Pairing.

⚠ Warning: See Bluetooth Pairing and Voice Recognition in your Infotainment System Booklet for more detailed information and for important safety warnings.

App-Connect/ myVW

To start App-Connect, pair your smartphone to your VW's Bluetooth and watch as your select apps appear on the touchscreen display. Need a couple extra bars on your phone's battery? Get a charge beyond just your driving experience. Plug your phone into your VW's USB port, and enjoy the same access.

Wireless App-Connect with Apple CarPlay Integration

To connect:

1. Pair your phone to the Volkswagen Infotainment system with Bluetooth.
2. A prompt will display on the vehicle touchscreen asking if you want to use Bluetooth or Apple CarPlay.
3. Select **Apple CarPlay**. If this is the first time, accept the confirmation on your iPhone®.

OR

1. Simply unlock your iPhone and plug it into the USB port using a certified lightning cable. After choosing to use Apple CarPlay, your iPhone will ask if you'd like to use Apple CarPlay wirelessly for future connections.

Note: Please confirm all prompts from App–Connect on the mobile device for successful Apple CarPlay connection.

Watch the Apple CarPlay Wireless Connection video.

Apple CarPlay®

Apple CarPlay is a smarter way to use your iPhone while you are in your Volkswagen. With an updated user interface that helps you control tunes, turns and Siri® suggestions, a calendar app that lets you view and manage your day, and maps that reveal more of what's around you, getting there just got a whole lot easier—and a lot more fun.*

1. Ensure you are running the latest iOS on your device.
2. Unlock your iPhone and plug it into the USB port using a certified lightning cable.
3. A message will appear on the Infotainment system display stating that a new device has been detected. It will ask, "Do you want to connect with Apple CarPlay?" Select **Connect**.

OR

1. Pair your iPhone to your Infotainment system's Bluetooth connection. When the "Select a connection technology" pop-up appears, select **Apple CarPlay**.
2. Select **Allow** on your iPhone to enable Apple CarPlay to access your iPhone while your iPhone is locked.

*Always pay careful attention to the road, and do not drive while distracted. Not all features are available on all operating systems. Standard text and data usage rates apply. App–Connect features require a compatible device, operating system and mobile apps. See mobile device and app providers for terms and privacy.

Note: You will have to have had an unlocked iPhone within the past hour in order to use Apple CarPlay. When you are connected using Apple CarPlay, your iPhone can no longer be used as a MEDIA source or as a Bluetooth device. Apple CarPlay is compatible with iPhone 5 or higher running iOS 7.1 or later. Further information can be found at support.apple.com and siriusxmguide.com. Apple CarPlay is a trademark of Apple Inc.

Watch the Apple CarPlay USB video.

Features

Apple CarPlay features Siri voice control. Siri must be enabled on the device to use Apple CarPlay. There are two ways to activate Siri:

- Press and hold the **Voice Control** button on the multi-function steering wheel until you hear the tone.
- Press and hold **Home** on the touchscreen to activate Siri.

1. **Home** has two features:
   - Return to the Apple CarPlay home screen or to the Apple CarPlay Dashboard.
   - Long press to activate Siri.
2. **Phone:** Siri can help you make calls, return missed calls and listen to voicemail.
3. **Maps:** Opens Apple Maps for turn-by-turn directions, traffic conditions, immersive 3D experiences and estimated travel time. Siri can also help with directions. Activate Siri and say, "Navigate to," and your destination.
4. **Messages:** Siri can send, read and reply to your text messages for you.
5. Tapping the **Volkswagen Logo** icon simply takes you to the Volkswagen native user interface with all the features and functions of Apple CarPlay still active.
   - To charge iPhone only, disconnect from Apple CarPlay by pressing the **Volkswagen Logo** icon, then select **Disconnect** on the touchscreen. This will allow Bluetooth® access while charging your iPhone.

Click here for further information on Apple CarPlay apps.

Wireless App-Connect Android Auto

To connect:

1. Pair your phone to the Volkswagen Infotainment system with Bluetooth.
2. Select **Use Android Auto** or select **Cancel** for Bluetooth connection.

Note: Please confirm all prompts from Android Auto on the mobile device for successful Android Auto connection.

Watch the Android Auto Wireless Connection video.

Android Auto™

Use some of your favorite Android™ applications on the road through your Volkswagen's Infotainment screen. Hands-free, you can talk to Google on Android Auto to get driving directions, send a text or place a phone call. Android Auto is made to help you focus on the road while having fun along the way.

1. Ensure you are running the latest Android™ OS on your device and download Android Auto from the Google Play Store. An active Google account and an internet connection is required. If you're using Android 10 or higher, the app is already on your phone.
2. Plug your Android phone into the USB port using a certified USB Cable.
3. Press the **App** key on the touchscreen.
4. Select **Android Auto** on the touchscreen. Ensure your phone is unlocked and pair your Android phone to your Infotainment system's Bluetooth connection. Then, select **Use Android Auto** in the pop-up.
5. When you see the data transfer prompt, select OK on the touchscreen.
6. Follow the instructions on your device to continue setup.
7. Android Auto will appear on the Infotainment touchscreen once all the prompts have been accepted on your device.

Google, Android, Google Play and Android Auto are trademarks of Google LLC. Click here for further information.
To use Android Auto on your car display, you'll need an Android phone running Android 6.0 or higher, an active data plan and the Android Auto app.

Features

1. **Microphone:** Google Assistant can be activated with a long press of the **Microphone** icon on the touchscreen or by using touchscreen commands that work with available apps. Google Assistant can also be activated using your voice to easily send messages, get directions, control media and more. Just say, "Hey Google," long-press the **Voice Control** button on the multi-function steering wheel, or tap the **Microphone** icon on the touchscreen to get started.
2. **Navigation:** Predictive navigation provides turn-by-turn directions, traffic conditions and estimated travel time. Android Auto can predict where you want to go next based on your calendar and recent destinations.
3. **Phone:** Listen and reply to text messages, make calls or check your voicemail.
4. **Home Screen:** Takes you back to the home screen of Android Auto.
5. **Music and Audio:** Use your touchscreen to access your favorite artists, songs and playlists. Android Auto lets you stream from apps such as Pandora, Spotify and iHeartRadio.

Tapping the Exit icon simply takes you to the Volkswagen native user interface, then select **Disconnect** if you wish to completely disconnect from Android Auto.

Watch the Android Auto video.

myVW

All things VW. All in one place.

Put essential tools and information at your fingertips. Enjoy features such as:

- Service reminders[1], scheduling & history[2]
- Maintenance schedules
- Roadside assistance requests[3]

Plus, get remote features[4] at no additional charge for five years[5] from the date of purchase when you activate VW Car-Net® Remote Access:

- Lock/unlock[6]
- Vehicle alerts
- Last parked location[7]

myVW Enrollment Process (if not performed by dealer):

1. Download the myVW app[8]
2. Click "Sign up" and enter your email and a password
3. You'll get an email; click on the link
4. Follow the steps to set up your account
5. If you do not see your car in the app:
   - Enter the VIN found on the driver's side of the dashboard
   - Scan QR code from your infotainment screen. Go to **Menu** > **Settings** > **VW Car-Net online services** > **Registration**
   - On the Golf GTI S trim, press i-button call located in the vehicle's overhead console and provide the registration code to the Call Agent
6. Create a 4-Digit PIN
7. Activate VW Car-Net to enjoy remote features[4]

To learn more about myVW go to **vw.com/owners**

[1] Volkswagen highly recommends that a maintenance service be performed every 10,000 miles or 12 months, whichever occurs first. Actual recommended service intervals and scheduled maintenance services vary based on vehicle model, model year, and mileage. See your Volkswagen dealer, warranty & maintenance booklet, and/or VW Care Terms and Conditions for details.
[2] Service history is available as long as work was performed since after January 2014 at a participating Volkswagen dealership.
[3] Roadside Assistance provided by a third party. May require additional payment for services rendered. See owner's literature for limitations and details.
[4] Available on most MY20 and newer vehicles. Always pay careful attention to the road and do not drive while distracted. Certain services require trial or paid subscriptions, which may have their own terms and conditions. VW Car–Net Remote Access requires a VW ID. myVW app, and myVW account, cellular connectivity, network compatible hardware, availability of vehicle GPS signal, and acceptance of Terms of Service. Not all services and features are available on all vehicles and some features may require the most recent software update. Certain Car–Net services, such as Roadside Call Assist, connect out to 3rd party providers that may require additional payment. Standard text and data rates may apply for app and web features. See Terms of Service, Privacy Statement, and other important information at www.vw.com/carnet. Do not drive while distracted. Vehicle features and content may vary depending on vehicle equipment. Please see owner manual for further information.
[5] Remote features from Car–Net offered for 5 years from vehicle in–service date.
[6] Requires myVW mobile app. Standard text and data rates may apply. See Owner's Manual for further details and important warnings about locking and unlocking your vehicle remotely.
[7] Standard text and data rates may apply and acceptance of Car–Net Terms of Service. Do not use feature to locate stolen vehicle.
[8] Standard text and data rates may apply. Always pay careful attention to the road, and do not drive while distracted.

Warning: See Navigation in your Infotainment System Booklet for more detailed information and for important safety warnings. Navigation is an optional feature.

Warning: See myVW in your Owner's Manual for more detailed information and for important safety warnings.

Warning/
Indicator Lights

For additional information on indicator lights, refer to your vehicle's Owner's Manual.

- Central warning light
- Collision warning

- BRAKE WEAR — Front brake pads worn
- Depress the brake pedal
  ACC driver intervention warning
- High–voltage battery drained
- Engine coolant system malfunction
- Steering malfunction
- 12– Volt vehicle battery
- Deep discharging the high–voltage battery
- Fault in high–voltage system, High–voltage system overheated, electric drivetrain overheated
- Fasten safety belt
- ESC — Lights up: ESC malfunction or ESC switched off by the system
  Flashes: ESC or ASR is working
- Lights up: ESC malfunction or ESC switched off by the system
  Flashes: ESC or ASR is working
- Anti–Lock Braking System (ABS) malfunction
- ABS — Anti–Lock Braking System (ABS) malfunction
- Driving light failure
- Washer fluid level too low
- Windshield wiper malfunction
- Rain/light sensor malfunction
- Lights up or flashes: Problem with the steering
- Tire pressure too low
  Tire Pressure Monitoring System (TPMS) malfunction
- SOS — Malfunction in the emergency call system
  Limited function in the emergency call system

- Lane Assist in control, Semi–automatic vehicle control in a medical emergency (Emergency Assist) is functioning
- Electronic engine sound (e–Sound) malfunction
- Range calculation malfunction
- Airbag system or safety belt pretensioner malfunction, Airbag system or safety belt pretensioner deactivated with diagnostic equipment
- Adaptive cruise control (ACC) not available
- Reduced driving power
- Side Assist malfunction
- Front Assist is not available
- Turn signals, left or right
  Emergency flashers switched on
- Trailer turn signal
- Cruise control switched on, regulation active
- Adaptive Cruise Control (ACC) regulates, no vehicle driving ahead is detected
- Adaptive Cruise Control (ACC) regulates, vehicle driving ahead is detected
- High beams or headlight flasher
- High beam control active
- Sport driving mode
- Individual driving mode
- Autonomous Emergency Braking starts
- Special driving mode
- Drift driving mode
- Race driving mode
- Distance warning
- Service due
- Outside temperature id below +39 °F (+4 °C)
- High–voltage battery charge status

Failure to heed warning lights and instrument cluster text messages can cause the vehicle to break down in traffic and result in a collision and serious personal injury.

- Never ignore warning lights or text WARNINGS.
- Always stop the vehicle as soon as it is safe to do so.
- Park the vehicle at a safe distance from moving traffic and where no part of the hot catalytic converter and exhaust system can come into contact with flammable materials under the vehicle, such as dry grass, brush, spilled fuel, etc.
- A broken–down vehicle presents a high accident risk for itself and others. Switch on emergency flashers and set up a warning triangle to warn oncoming traffic.
- Before opening the engine hood, always switch off the engine and let the engine cool down.
- Always be very careful when working in the engine compartment, which is a potentially dangerous area in any motor vehicle and can cause serious personal injury.
